

CUBE FINANCIAL GROUP

BRAND GUIDELINES & SYSTEM IDENTITY

Document Version: 1.0

Date: June 2026

Classification: Confidential Corporate Asset

Author: Brand Strategy & Design Architecture Team

2. Master Logo System & Clear Space

The approved Cube Financial Group logo is the definitive, unalterable visual signature of the brand. The 3-dimensional geometric cube represents organized capital, integrated asset layers, and structural alignment. This symbol must always be treated as a single cohesive unit.

CLEAR SPACE RULE

To preserve visual integrity and high-end positioning, the master logo requires strict isolation from competing elements. The absolute minimum clear space surrounding all sides of the logo must equal the dimension of exactly two rows of the cube pattern, denoted as X .

Mandatory Isolation Formula

Let H_{cube} be the total height of the cube symbol. The required clear space boundary margin M_{cs} is mathematically defined as:

$$M_{cs} = 0.25 \times H_{cube}$$

MINIMUM SIZING

APPLICATION MEDIUM	MINIMUM ALLOWABLE WIDTH	RESOLUTION REQUIREMENT
Digital Assets	180 pixels wide	72 dpi / @2x for Retina screen scales
Print Collateral	35 millimeters wide	300 dpi Vector output (PDF/EPS format only)

3. Color Palette Specification

The corporate color system relies on high-contrast, deeply saturated executive tones supported by muted metallic accents and precise neutrals. Bright primary or neon colors are strictly banned to prevent a retail fintech appearance.

 Deep Corporate Navy HEX: #0A192F RGB: 10, 25, 47 CMYK: 100, 85, 45, 55	 Metallic Classic Gold HEX: #D4AF37 RGB: 212, 175, 55 CMYK: 20, 30, 85, 10	 Sapphire Supporting Blue HEX: #1E3A8A RGB: 30, 58, 138 CMYK: 95, 80, 10, 5
 Warm Neutral Light Grey HEX: #F4F6F9 RGB: 244, 246, 249 CMYK: 3, 2, 1, 0		

APPLICATION RATIOS

To maintain a high-end corporate presentation, color distribution across any single layout must strictly match the following target proportional weights:

COLOR TIER	TARGET VISUAL AREA WEIGHT (%)	PRIMARY APPLICATION USE CASES
Background White / Neutral Light	65% to 75% Area	Document fields, letterhead canvases, website structural negative spaces.
Deep Corporate Navy	20% to 25% Area	Primary text blocks, executive headers, solid presentation slide backgrounds.
Metallic Classic Gold	2% to 5% Area	Delicate structural divider rules, focal key callouts, subtle line iconography accents.

4. Typography & Font Hierarchy

The typography system is designed for absolute structural stability and perfect cross-platform editorial readability. Fonts must never be substituted unless entirely unsupported by the native system architecture.

LATIN/ENGLISH TYPOGRAPHY SYSTEM

HIERARCHY LEVEL	FONT FAMILY SPECIFIED	SIZE / WEIGHT	TRACKING & FORMATTING
Primary Headlines	Trajan Pro / Times New Roman	18pt – 24pt / Regular	Tracking: +100 / Uppercase or Sentence case
Sub-headers (H2/H3)	Arial / Helvetica	12pt – 14pt / Bold	Tracking: +50 / All Caps / Gold color fill
Body Copy Text	Arial / Times New Roman	10pt – 11pt / Regular	Line Height: 1.6 / Color: #2D3748

HEBREW TYPOGRAPHY SYSTEM

HIERARCHY LEVEL	FONT FAMILY SPECIFIED	SIZE / WEIGHT	TRACKING & FORMATTING
Primary Headlines	Heebo / Assistant	20pt – 26pt / Bold	Clean, un-serifed high-stability weight
Sub-headers	Heebo / Assistant	13pt – 15pt / Medium	Color: #0A192F or #D4AF37 accent fill
Body Copy Text	Heebo / Assistant	10pt – 10.5pt / Light or Regular	Line Height: 1.55 / High screen optimization

5. Correct and Incorrect System Usage

Consistency is key to maintaining a premium brand identity. The following examples outline mandatory design boundaries. Any deviation dilutes the firm's reputation for stability and institutional precision.

MANDATORY CORRECT EXECUTIONS

✓ Rule 1: Monochromatic and Vector Alignment

The logo must always sit flat on light ivory, pure white, or solid deep navy backgrounds. All typographic elements must run perfectly parallel to horizontal document margins.

✓ Rule 2: Complete Symbol Cohesion

The cube symbol must remain perfectly intact as a single block. The layout must match the original asset dimensions without modification.

PROHIBITED VIOLATIONS

✗ Violation 1: Component Fragmentation

Never detach, offset, floating-animate, or pull out individual smaller squares from the primary cube cluster. The cube represents structural unity; fracturing it breaks the brand code.

✗ Violation 2: Extraneous Financial Imagery

Never introduce secondary industry icons. The use of umbrellas (insurance), shields (security), compound charts, arrows, coins, houses, or traditional scales of justice is strictly banned. The cube is the brand.

✗ Violation 3: Unauthorized Distortions

Do not skew, stretch, rotate, add heavy dropshadows, or apply primary/neon color gradients to the cube surfaces or fonts.

6. Corporate Tone of Voice

The Cube Financial Group voice is authoritative, reassuring, measured, and highly intellectual. We speak with the discretion of a private family office and the technical clarity of institutional asset managers.

COMMUNICATION PRINCIPLES

WE ARE	WE ARE NOT	PRACTICAL WRITING EXAMPLE
Clear & Certain	Simplistic or Patronizing	"We restructure capital layers to optimize generational tax transitions."
Conservative & Steady	Hyped or Fintech-Aggressive	"Our focus is long-term capital preservation and structured wealth progression."
Direct & Professional	Aloof or Overly Academic	"We reduce systemic complexity into clean, actionable, compliant frameworks."

SLOGAN PRESENTATION SYSTEMS

The Hebrew slogan **מפצחים את המורכבות** (Solving Complexity) must always sit directly below the primary English wordmark in a smaller, clean weight, aligned to the vertical center axis of the asset layout.
